

Feniks is a conference chair that can be characterised as a chair wide usability. The chair cannot only be used in meeting rooms or canteens, but fits in to every interior.

Feniks has an outstanding seating comfort and a modern look, Feniks is also unique because of its connection between back and frame that completely hides all fixings. Besides this connection, the black armrests make the design complete.

The standard delivered stacking bumper protects the upholstery during stacking. The optional ganging system is available for the following configurations:

Chair-chair  
 Chair-armchair  
 Armchair-armchair

- Unique connection between back and frame hiding all fixings
